User Manual

1.Introduction

This wireless presenter is suitable for any presentation or PowerPoint occasion. With it, you don't need to stand beside your computer or have an assistant. It is very simple to use, just plug and play, and no driver is required.

The device enables you to control your presentation wirelessly up to 10 metres (32 feet) away, thanks to the advanced Radio Frequency (RF) technology that works through walls.

It combines the functions of a laser pointer and remote control. It is tailored as a convenient tool for presentations, teaching, meetings, speeches and training etc.

2. Operating System

The device supports Windows 98 / ME / 2000 / 2003 / XP / Vista / 7/ 8 /10, Linux and Mac OS

3. Parts & Functions

3.1 Front

3.2 Back

Once the USB receiver is connected to a computer, it would normally detect the signal sent from the presenter automatically, if however it does not due to interference caused by other devices, press Connect to re-establish the connection.

4. Battery Installation

- The unit is powered by 1 x AAA battery
- Remove the battery compartment cover
- Insert 1 x AAA battery into the battery holder
- Put the battery compartment cover back in position

Press and slide out the battery cover

Note:

1) Do not insert battery into the presenter in the wrong direction.
2) Do not leave bad or exhausted battery in the presenter.
3) If you do not use the presenter for a long period of time, remove the battery to avoid possible damage from battery corrosion.
4) If the presenter does not function correctly or if the operating range becomes reduced, try to replace the battery with new one.
